

# Kraft Sacks

**osma  
kraft**

Osmakraft is one of the leader manufacturers of Kraft sacks in the Middle East region. Our kraft sacks have a variety of applications such as the packing of gypsum and cement. We can supply different types of sack sizes according to our client requirements.

Our quality range of Kraft based sacks is designed in line with the specific requirements of our customers. We provide a cost effective range of products which optimize the packing and distribution processes across a diverse range of market segments.

These sacks are generally manufactured using between two or three plies of Kraft in a wide range of different capacity and we can supply the sacks with additional P.E membrane ply upon client's requirements. The outer Kraft ply can be printed in 4 different colors.

**Features:**

- Clean and consistent fibers.
- Fast bagging and easy sealing.

**Main Characteristics:**
